DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed 15 June 2004 has been entered.

Allowable Subject Matter

2. Claims 1-27 are allowed.
3. The following is an examiner's statement of reasons for allowance: Applicant has amended the claims further defining the claimed invention. In particular, applicant has added the limitation samarium (Sm) "at least partially replacing an element on one of the vertices of the perovskite structure" in each independent claim.
4. Thus, regarding independent claims 1, 12, and 24, the prior art of record neither shows or suggests a phosphor comprising, in addition to other limitations of the claims, a perovskite structure and samarium at least partially replacing an element on one of the vertices of the perovskite structure.
5. The subject phosphor having samarium, as described above, is provided for improving the luminance and lifespan of the phosphor. Due to their dependency upon independent claims 1, 12, and 24, claims 2-11, 13-23, and 25- 27 are also allowable. The design is new and unique to the art.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
